Inspiring your vision

Find Your Perfect Fit

Showers for Every Case

Design your shower for your needs: our portfolio provides you with a variety of options – for a bathroom that is as unique as you are.

Reasons for a Dornbracht Shower

Get to the heart of what makes a Dornbracht shower product so special: Trail-blazing design, unique water experiences and simple concealed solutions.

Dornbracht Showers

Be inspired by our pre-defined solutions in all product and price categories: We show you example applications to help you realise your vision – in style and in size. Our solutions fit all circumstances.

Mix & Match – endless possibilities

The representation of product variants gives you the opportunity to get creative, and implement your own applications – in line with your personal taste.

How to plan your individual shower experience

We have compiled an exclusive guide to help you design your shower area in style, and select high-quality shower solutions. It offers inspiring ideas and practical recommendations for an exceptional shower experience.

Finishes Overview

1 Reasons for a Dornbracht Shower

What makes a Dornbracht shower so distinctive? What distinguishes it from the rest and makes it a safe option for the long term? One thing is certain: With a Dornbracht shower, you are always opting for an exceptional water experience.

Everything matches – from the washstand to the shower: with Dornbracht, it is possible to have the fittings throughout your bathroom in the same design. Recurring forms, handles, or rosettes create a consistent look throughout the space.

With Dornbracht, it is possible to give all products a uniform finish, thus creating a harmonious overall picture across all bathroom applications. There is a variety of carefully curated finishes to choose from, ranging from timeless, classic colours, to elegant golden hues, to expressive dark variants.

You can find our range of finishes on the last page.

The Fascinating Shapes of Water

Most of our know-how goes into the development of innovative and effective flow modes. We shape the element of water in fascinating ways – whether a powerful waterfall, a crystalclear laminar flow, or as fine rain. Dornbracht rain is special: its secret lies in the ample droplets that land so softly onto the skin, it is as if they have fallen from the clouds.

FlowReduce – A Sustainable Approach

As a leading expert in water presentation, Dornbracht offers FlowReduce for as a resource-saving product products with the familiar Dornbracht quality.

By saving money and resources, the shower experience has become sustainable – water consumption is significantly reduced with these low flow products (up to 54 % for hand showers).

For additional sustainable resource consumption options, Dornbracht offers selected shower products in a FlowReduce+ version via the Atelier Service.

the shower experience (Atelier Service)

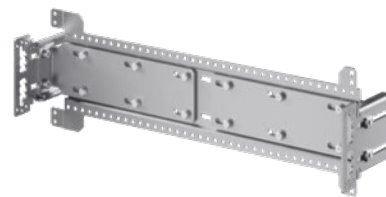

Invisible Perfection

With concealed solutions from Dornbracht, the installation of our fittings is completed easily and flexibly – and is totally invisible:

by using the xGRID track system, all the elements are accurately aligned, both horizontally and vertically, behind the wall.

Customised solutions can be perfectly implemented, even in difficult structural situations, for maximum creative freedom and uncompromising aesthetics.

xGRID for perfect alignment

With concealed products from Dornbracht, ambitious design solutions can be implemented quickly, easily, and perfectly.

3 Mix & Match – endless possibilities

Design your individual shower experience: Our modular system gives you more than enough freedom to design your bathroom. In many designs, recurring elements such as handles or rosettes give the bathroom a consistent look – right down to the washstand. Others have such a puristic design that the possible combinations are even more wideranging. Here we differentiate between universal (goes with all designs) and series specific (goes with selected designs, usually generic round and angular). So

the design and fixtures of our shower solutions can be individualised in a variety of ways to match your wants and needs completely. All previous applications can either be implemented with alternative products, or upgraded by other modular components – just get creative.*

*Check whether individual cases are technically feasible.

Shower Sets

Mix and match your personal, design-oriented shower application of hand shower, control element and wall pipe with our shower sets. Also choose from different rosette design variants, and the desired hand shower functionality.

The products shown are merely a selection. For a complete overview, scan the QR code.

Our pivoting shower heads, some with several flow modes, bring flexibility to your shower experience – according to need and shower zone. Choose from different designs with regard to the design language of the rosette and shower head. Also opt for one or more flow modes.

The products shown are merely a selection. For a complete overview, scan the QR code.

Shower Systems

Discover our shower systems and their varied sizes and high-quality finishes that cater to individual shower requirements in terms of design and comfort. Decide which feature you require in thermostat or mixer, and choose your design language option, the size of the rain shower, and the functionality of the hand showers.

The products shown are merely a selection. For a complete overview, scan the QR code.

Bring the feeling of a natural shower of rain to your bathroom. Choose between an angular, round, or soft design language for the style, and between wall-mounted, ceiling-mounted or ceiling-integrated for the installation. You can also choose a variant with a second flow mode, and even light integration.

The products shown are merely a selection. For a complete overview, scan the QR code.

Rain Panels

Experience wellness for the body and soul – in multi-sensory moments with our rain panels. In the angular design, you can choose from two different sizes and flow mode ranges, with light integration as an option. In the round design language, we offer an understated design for a boundless water experience, or a sculptural design that adds a defining touch to the architecture.

With Dornbracht WATER MODULES, it is easy to upgrade your bathroom to a private spa. They are adaptable, can be integrated into every shower solution, and enhance your daily spa and shower ritual: To promote individual wellbeing, energy and good health. The main difference between the different WATER MODULES is the way the water is presented. Opt for our waterfalls, where water cascades over your neck, or for our massage modules, that target individual areas of your body with powerful bursts of water. The laminar flow in our Kneipp modules completely covers the skin in water, making therapeutic affusions easy to administer.

Hand Shower Sets

Choose the perfect solution for your individual shower application from various hand shower designs. The singlepoint attachment is not only minimalist, it also saves space. The droop of the shower hose in the complete hand shower set with two attachment points is gentle and aesthetically pleasing. Both variants are available in round and angular design languages. You can also decide on the functionality you expect from your mix-and-match hand shower.

How to plan your individual shower experience

Design your own personalised shower experience in just 3 steps:

1

Choice of outlet points

In most cases, the choice of outlet point(s) is the first decision to be made when specifying a shower solution. This offers the most options in terms of function and design.

Suitable concealed elements for outlet points and operation

Dornbracht concealed products ensure safe and efficient installation on site. The specific design of each product guarantees maximum quality and performance. All products are coordinated with each other, offering planning reliability and efficiency at the highest level.

2

Selecting a control element

Depending on the individual configuration of your outlets, you will also need a control element to regulate the water. Surface-mounted or flush-mounted? As a mixer or with a thermostat function? One or more outlets, controlled simultaneously or individually? There are many ways to regulate the water flow in the shower.

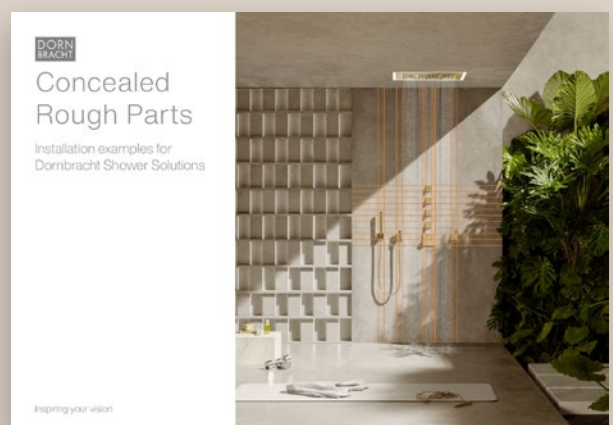

3

Planning Guide

Further information about perfect concealed planning can be found in our Planning Guide.

dornbracht.com/concealedroughs-planning-guide

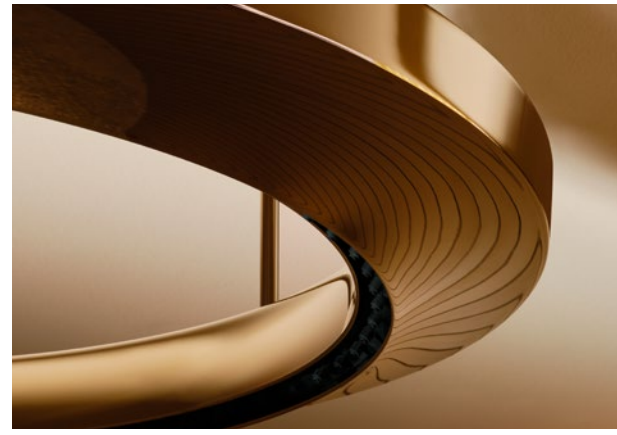

Design

Individual design for your bathroom: Dornbracht offers both progressive and purist designs for washbasins and showers, perfectly matched to your personal bathroom design.

Exclusive variety of surfaces: Choose from a wide range of Dornbracht finishes: from classic metals to warm dark tones and elegant gold nuances to modern bronze tones – for unique accents in your bathroom.

Harmony and consistency throughout the bathroom: thanks to coordinated design elements and guaranteed uniform colouring across all products, you can create a consistent, harmonious look from the washbasin to the shower.

Function

Individual spray modes for your shower experience: Discover a wide range of spray modes, from gentle rain to invigorating massage jets – for a shower experience that perfectly suits your preferences.

Optimal adjustment of the outlets: We offer maximum flexibility in the positioning of the outlets to perfectly tailor your shower experience to your body size.

Flexible expansion with shower modules: Expand your shower with additional outlets (water modules) for an even more varied experience.

Save water with FlowReduce: Our FlowReduce products significantly reduce water consumption without compromising on comfort or the showering experience –

Budget

Budget and product selection: Your Dornbracht shower solution can be flexibly adapted to your budget. Please note: Product size and range of functions have a significant impact on the price.

Materiality as a price factor: The choice of material plays a decisive role in the price. Chrome is the entry-level option, while real gold surfaces are in the premium segment.

Modernisation: Renovation or retrofitting? When planning your costs, don't forget to factor in the cost of labour and tiling materials. Many of our premium entry-level models can be easily retrofitted into existing bathrooms without the need for costly renovation work.

Structural conditions

Important planning factors: When selecting products, consider the size of the shower area, room height, water pressure, and volume, and the space available for concealed installation.

Flexible product variants: We offer a wide selection of product variants in terms of size, flow rate, installation types, and the appropriate concealed elements.

Comprehensive planning documents: Our detailed data and documents provide you with optimal support in bathroom planning by reconciling individual preferences with structural conditions.
